

### **EnviroLeach Announces DTC Eligibility**

Vancouver, BC, January 10, 2018 – EnviroLeach Technologies Inc. (the “Company“ or “EnviroLeach”), (CSE: ETI) (OTCQB: EVLLF), is pleased to announce that the Corporation's common shares traded on the OTC Markets Group Inc.'s OTCQB Venture Market in the United States, under the symbol "EVLLF", are Depository Trust Company ("DTC") eligible. DTC is a subsidiary of the Depository Trust & Clearing Corp. and manages the electronic clearing and settlement of share transactions for publicly-traded companies.

Duane Nelson, CEO of EnviroLeach stated, “Achieving DTC eligibility will simplify trading of EnviroLeach shares on the OTCQB Venture Market and will allow U.S.-based investors and brokers the ability to fully trade our common shares on a U.S. market which will benefit the Company and all of its shareholders.”

The OTCQB Venture Market is for early-stage and developing U.S. and international companies that must be current in their reporting and undergo an annual verification and management certification process. DTC eligibility allows EnviroLeach shares to be more easily and economically transferred between brokerage accounts electronically within the United States. DTC is the largest securities depository in the world, providing clearing and settlement efficiencies for brokers, as well as various other services.

In addition to the OTCQB, shares of EnviroLeach continue to trade on the Canadian Securities Exchange (CSE).

#### **About EnviroLeach Technologies Inc.**

EnviroLeach Technologies is a technology company and near-term gold producer that is engaged in the development and commercialization of environmentally-friendly formulas and technologies for the treatment of materials in the mining and E-Waste sectors. Using its proprietary non-cyanide, water-based, near neutral pH treatment process, EnviroLeach extracts precious metals from ores, concentrates, and E-Waste using only FDA approved additives to ambient temperature water.

Backed by the momentum of a first-class staff of scientists and engineers, tens of thousands individual assays, independent validations and strategic partners, EnviroLeach’s technology will become the standard for the provision of eco-friendly methods for the hydrometallurgical extraction of precious metals in both the conventional mining and E-Waste sectors.
